

ALLYSON WEST

Front End Developer

Indianapolis, IN | hello@allysonwest.dev

linkedin.com/in/alrwest | github.com/1want2sayhello | allysonwest.dev

PROFESSIONAL SUMMARY

Front-end developer with a UX/UI design background, building responsive React applications with reusable component architecture and clean state management. Experienced translating designs into production interfaces, working from user research through deployment. Skilled in React, JavaScript (ES6+), client-side routing, REST API integration, and unit testing.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3, SCSS/SASS
Frameworks	React, React Router, TanStack Query
Styling	CSS Modules, SCSS Modules, Responsive & Mobile-First Design
Testing	Vitest, Unit Testing
Tools	Git, GitHub, Vite, npm, ESLint, Figma, Adobe Illustrator, XD
Concepts	Component Architecture, State Management (Context API, useReducer), REST APIs, Code Splitting, Performance Optimization, Error Handling, Accessibility, UX Research, Wireframing

PROFESSIONAL EXPERIENCE

Front-End Developer Intern

Indiana Sports Corp. | Jan – Jun 2024

Experience 317 — Sports Event Map Application

- Built a mobile-first interactive web application with React and Mapbox for the 2024 Olympic Swim Trials, deployed to production at experience317.com (now retired)
- Recommended the React + Mapbox architecture after evaluating customization needs, expected traffic, and future iteration
- Designed map markers and an event-themed color system, consolidating sponsored events and partner venues into a single wayfinding interface
- Validated icon recognition and navigation flow through 5-participant usability testing, iterating on the interface before final release

Merchandising Manager

Disc Replay Castleton | Jun 2018 – Dec 2025

- Promoted from Associate to Shift Lead to Social Media Lead to Merchandising Manager over seven years, ultimately leading merchandising standards for a high-traffic retail location.
- Managed time-sensitive deliverables including invoicing and social media content while maintaining brand consistency

PROJECTS

Tech Tunes — Music E-Commerce Application

Mar 2026 – Present

React, TanStack Query, React Router, SCSS Modules, Fuse.js, Vitest, Vite

Live: tech-tunes-commerce.vercel.app | Code: github.com/1want2sayhello/tech-tunes

- Built a multi-category storefront with persistent cart state managed through Context API and useReducer, supporting size-specific product variants and quantity handling
- Implemented fuzzy search across three product catalogs with URL-based sort and filter state, keeping results shareable and refresh-safe
- Normalized three differently-shaped data sources through reusable mapper functions, unit tested with Vitest
- Optimized load performance with route-based code splitting, loading skeletons, and image fallbacks; handled loading, empty, and error states throughout

Fizz Fix — Soda Shop Ordering UI

Sep 2026 – Present

React, React Router, Mapbox, SCSS Modules, Vite

Live: fizz-fix.vercel.app | Code: github.com/1want2sayhello/fizz-fix

- Built a responsive soda shop ordering UI with a category-driven, data-driven menu and centralized cart state managed through Context API and useReducer
- Persisted cart contents to local storage so in-progress orders survive page refreshes and return visits
- Integrated an interactive Mapbox map for store location discovery, syncing map state with accessible, semantic location controls
- Built reusable menu, cart, navigation, and location components with SCSS Modules for scoped, maintainable styling

EDUCATION & CERTIFICATIONS

Indiana University, Luddy School of Informatics, Computing & Engineering

Indianapolis, IN

Bachelor of Science in Media Arts & Science

May 2024

Concentration: Web Development & Design · Certificate: Human-Computer Interaction (HCI)
